

NORDPOOL®

SPA FOR SCANDINAVIA

This year, it'll be 37°C
regardless of the weather.

Envision a cold winter evening in December. You slowly sink into a hot bubbling bath and gaze at a star-studded winter sky. You listen to the silence, and your entire body relaxes. We call it quality of life and pure enjoyment. The best thing to do for body and soul? Give yourself a moment to forget the shoulds and should haves – and melt away everyday stress.

For many years, Sweden's Nordpool company has been producing outdoor spa tubs for the northern hemisphere. We know exactly how to design, construct, assemble, mount, and install year-round tubs for all climates. We create tubs that are good for body, mind, spirit, and wallets! Tubs with three-layer insulation, separate circulation pumps, well-insulated covers, and many other intelligent features and functions.

37°C

Deep, deeper, deepest.

There's something magical about sinking into water. Out in the blue. But we're not talking about deep-sea diving in our tubs. Although almost. We want to facilitate feelings of luxury such as warm, soft bubbling water embracing your body under a starry, midnight blue sky. That's why we increased the depth of our tubs to 75 centimeter – mostly likely the deepest tubs on the market. We're proud of this feature, and welcome you into the blue.

Pause

Listen to the silence.

Comforts, such as time and tranquillity, are scarce during demanding daily living. Due to revolving lifestyles, the simplest things in life are now luxury items; they're scarce and worth hard cash. That's why we think it's important that you really relax when you take the time to sink into a tub. Then you'll hear the birds singing in the forest and the wind rustling the leaves. You'll enjoy a sense of serenity sinking into your body – thanks to our new, nearly silent Q series pumps by Balboa – a top-quality brand with some of the market's best, almost inaudible circulation pumps. Schhhh . . .

180

Winter bathing in good conscience.

It's no coincidence that we're called Nordpool (north pool). We develop our tubs in Sweden – for northern climates. We put extra effort into insulating and creating tubs that keep their temperatures up – despite bitter-cold winter months. All our spa tubs have 3-layer insulation, which enables better heat retention at much lower cost – compared to other tubs. A separate circulation pump contributes to minimal energy consumption. Fiberglass bottoms (with extra insulation) and stainless steel nozzles are other features that are suitable for harsh climates and are nicer to Mother Nature and your wallet.

Prefer saltwater tubs?

A saltwater spout requires fewer chemicals for maintaining clear, clean water. Many people feel that salt water feels softer and lighter. These models are adapted for salt-water use: Tor, Idun, Oden, Sarek and Abisko.

The salt-water package from Nordpool includes, for example, upgraded pumps, heaters, nozzles, and clear-water purification.

SPA FROG the enchanted frog

SpaFrog is a new, efficient water purification and treatment system. It won't turn into a prince if you kiss it, but it will keep your hot tub clean as if by magic. And really easily too – a soak in the tub should be a picnic.

SpaFrog is a simple-to-use water treatment system specially designed to work efficiently in hot water. When used together with the smart Blue Connect digital pool water analyser (see page 12) built into all of our hot tubs, your system will be virtually maintenance-free.

HOW IT WORKS

The SpaFrog system requires significantly less maintenance than conventional water purification. SpaFrog works using a combination of bromine and minerals and is specially designed to work efficiently in hot water. As water flows through the system, it's purified and disinfected to keep it fresh, clean and healthy.

EASY TO USE

Select the dosage for the bromine and mineral cartridges and insert them in the hot tub's built-in SpaFrog holder. You change one of them monthly, and the other one every three months. The dosage is adjusted simply by turning a knob depending on how often you use your hot tub and the number of people who use it at the same time.

KIND TO THE SKIN

Water purification using the SpaFrog system reduces the need to add chlorine. This makes the water gentler and minimises the risk of chapped skin and watery eyes, and you also avoid that strong chlorine odour.

BLUE CONNECT GOLD your digital hot tub monitor

Blue Connect Gold is a smart, digital water analyser that measures water quality. It provides information on what maintenance the tub needs to keep the water clean and crystal clear. Also compatible with saltwater.

You can access your water quality report via the Blue Connect app, available for download to your smartphone or tablet.

Extra-equip your tub with fabulous sound waves

Why should Näcken the Water Sprite be the only one to play music in the bath? Now you can invite Lady Gaga, Beethoven or Elvis to take a dip. Our sound system allows you to set the right atmosphere for the tub from the very start. A total experience.

The sound system is fully integrated in the tub and is invisible from the outside, but is easily controlled via Bluetooth from your mobile.

Tor / Q6

Tor has space for the entire family – with six seats (one of which is a lounge). It's the deepest tub on the market and 34 powerful nozzles plus a soundless, adjacent pump contribute to bathing quality and tranquillity.

Tor Q6. Benefits, features, functions.

Comfort: probably the best tub depth on the market.

Blood/lymph flow: the 3 HP massage pump maximizes massage effects.

Easy care: fully automated purification system with ozone cleaner, model XL60.

Energy efficient: 3-layer insulation with air valve, combined with a separate circulation pump.

User friendliness: Gecko's display controls.

Quality guarantee: All Nordpool tubs come with a 3-year warranty.

Specifications

SEATS	6	NOZZLES	34	WATER CAPACITY	1400 l
-------	----------	---------	-----------	----------------	---------------

Size:	2000 x 2000 x 970 mm	Air valve:	Yes
Seating:	6 seats, of which 1 is a lounge	Waterfall:	1 lighted
Water capacity:	1400 litres	Filtering system:	Elemental filtering
Weight:	300 kg	Ozone purification:	Yes, XL60
Electrical requirements:	380 V / 50 Hz	Lighting:	Reflecting main lamp, LED lights at water line, LED
Control system:	Gecko	Neck rests:	3
Heating system:	Gecko 3 kW	Acrylic layer:	Lucite®
Pumps:	1 water, 3 HP	Outer surface:	Ash Grey
	1 circulation, 0.25 HP	Insulation:	3 layers + air gap
Water nozzles:	34 RD	Inner surface:	Black or White
Water valve:	Yes		

Idun / Q7

Idun is one of the market's deepest tubs. This spacious 6-seat tub (2 of which are lounges) has 36 powerful nozzles and a barely audible, adjacent pump that circulates the water to give you serene, undisturbed bathing experiences.

Idun Q7. Benefits, features, functions.

Comfort: probably the best tub depth in the market.

Blood/lymph flow: the 3 HP massage pump maximizes massage effects.

Easy care: fully automated purification system with ozone cleaner, model XL60.

Energy efficient: 3-layer insulation with air valve, combined with a separate circulation pump.

User friendliness: Gecko's display controls.

Quality guarantee: All Nordpool tubs come with a 3-year warranty.

Specifications

SEATS	6	NOZZLES	36	WATER CAPACITY	1500 l
-------	----------	---------	-----------	----------------	---------------

Size:	2150 x 2150 x 970 mm	Air valve:	Yes
Seating:	6 seats, of which 2 are lounges	Waterfall:	1 lighted
Water capacity:	1500 litres	Filtering system:	Elemental filtering
Weight:	400 kg	Ozone purification:	Yes, XL60
Electrical requirements:	380 V / 50 Hz	Lighting:	Reflecting LED lights at water line, LED
Control system:	Gecko	Neck rests:	3
Heating system:	Gecko 3 kW	Acrylic layer:	Lucite®
Pumps:	1 water, 3 HP 1 circulation, 0.25 HP	Outer surface:	Ash Grey
Water nozzles:	36 RD	Insulation:	3 layers + air gap
Water valve:	Yes	Inner surface:	Black or White

Oden / Q8

Oden is our flagship when it comes to bathtubs from Nordpool. With 57 powerful nozzles and a nearly noiseless pump, all bathers are guaranteed a marvellous massage with sound volume that allows you to whisper to each other in the tub; 7 seats, of which 2 are lounges.

Oden Q8. Benefits, features, functions.

Comfort: probably the best tub depth in the market.

Blood/lymph flow: two, 3 HP massage pump maximizes massage effects.

Easy care: fully automated purification system with ozone cleaner, model XL60.

Energy efficient: 3-layer insulation with air valve, combined with a separate circulation pump.

User friendliness: Gecko's display controls.

Quality guarantee: All Nordpool tubs come with a 3-year warranty.

Specifications

SEATS	7	NOZZLES	57	WATER CAPACITY	1700 l
-------	----------	---------	-----------	----------------	---------------

Size:	2300 x 2300 x 1040 mm
Seating:	7 seats, of which 2 are lounges
Water capacity:	1700 litres
Weight:	450 kg
Electrical requirements:	380 V / 50 Hz
Control system:	Gecko
Heating system:	Gecko 3 kW
Pumps:	2 water, 3 HP 1 circulation, 0.25 HP
Water nozzles:	57 RD
Water valve:	Yes
Air valve:	Yes

Waterfall:	Yes
Filtering system:	Elemental filtering
Ozone purification:	Yes, XL60
Lighting:	Reflecting LED lights at water line, LED
Neck rests:	4
Acrylic layer:	Lucite®
Outer surface:	Ash Grey
Insulation:	3 layers + air gap
Inner surface:	Black or White

Svalbard

Our most affordable tub that creates exquisite experiences at low cost. Seating for up to 5 persons and a perfect choice for the little family. Same good insulation as our more expensive tubs, which facilitates good return on the investment.

Svalbard. Benefits, features, functions.

Great ROI: Very affordable outdoor tub that gives you a great return on your investment. One of our top sellers.

Easy care: Fully automated cleaning system using the model XL60 ozone purifier.

Quality guarantee: All Nordpool tubs come with a 3-year warranty. All essentials hold the same high standard as all Nordpool's tubs. No scrimping on key details.

User friendly: Adapted for all climates – particularly northern Europe.

Energy efficient: 3-layer insulation with air gap.

 Inner surface: White

Sarek

Sarek is a tub for individuals who like to hang out. With 5 seats (2 of which are lounges), there's room for family and friends. A multitude of nozzles (31) ensure that all bathers get great massages. An intermediate priced tub that gives you more for your money!

Sarek. Benefits, features, functions.

Comfort: Plenty of room for family and friends; 5 seats, of which 2 are lounges.

Easy care: Fully automated cleaning system using the model XL60 ozone purifier.

Quality guarantee: All Nordpool tubs come with a 3-year warranty. All essentials hold the same high standard as all Nordpool's tubs. No scrimping on key details.

Great ROI: Highly affordable outdoor tub that gives you great returns on your investment.

Adapted for all climates – particularly northern Europe.

Energy efficient: 3-layer insulation with air gap.

Abisko

One of our best sellers. A massage monster with 57 nozzles – and probably a market leader with that many nozzles. Abisko has 5 seats, of which 2 are lounges where bathers are getting a full-body massage. Maximized massage, continuous contentment.

Abisko. Benefits, features, functions.

Return on investment: Low cost, high quality tub; maximum bather satisfaction.

Comfort: Extra depth with ergonomically designed seats.

Easy care: Fully automated cleaning system using the model XL60 ozone purifier.

Blood/lymph flow: Extra powerful massage – thanks to the 57 nozzles.

Energy efficient: 3-layer insulation with air gap. Adapted for all climates.

Quality guarantee: All Nordpool tubs come with a 3-year warranty.

Outer surface:	Black
Insulation:	3 layers + air gap
Inner surface:	Black or White

Our larger outdoor tub has 2 ergonomically designed lounges – to provide maximum enjoyment and support. Comporting pillows off-load the neck. For 5 of our outdoor tubs, you can choose black or white inside.

Our “cockpits” (bench seats) are designed to give your entire body maximum support. The outdoor tubs have up to 57 nozzles. Many have two lounge chairs. And our new Q series is extra deep to maximize your bathing experience. Making stainless steel nozzles and extra-insulated bottoms is a matter of course for us.

Advice on how to prepare for your purchase:

PREPARATION and INSTALLATION

There's nothing unusual about installing a Nordpool tub. We deliver our hot tubs complete and ready to install.

PLACEMENT

Position your tub on a flat, packed surface such as a wooden deck or on patio tiles or stone (not directly on a lawn).

ELECTRICAL CONNECTION

A qualified electrician must do all electrical work.

FILLING and REFILLING

Use a garden hose to fill the tub.

SERVICE

When you buy a tub from Nordpool, you get fast delivery, good service, and a safe, secure transaction. Contact us for more information.

Quality pays off in the long run. We're particular about details, and we constantly develop functions and features so that our tubs are long lasting and easy to use.

Ambiance-generating LED lighting creates the desired atmosphere and colour scale in your evening bath. Reflective joints and fibreoptic strings are mounted in our tubs.

All Nordpool outdoor tubs are adapted for all climates. Consequently, they are insulated with 3 layers – with air gap between. Even the tubs' bottoms have extra insulation.

This keeps down heating costs, and the tubs are always ready for use. All our outdoor tubs come with an insulating lid that you can easily remove.

“Our philosophy is quite simple. We think everyone should be able to invest in an outdoor tub – regardless of the size of the wallet. In addition, we think it's a given that everyone should be able to afford high quality and reliability.”
