

SOAKING UNDER  THE SKY

SVENSKA
PRO

DESIGN YOUR OWN HOT TUB EXPERIENCE

A hot soak under the open sky is the HEIGHT OF LUXURY.

For all the senses, all year-round. Whether you turn your face to the summer sun and close your eyes, or let hoar frost turn your eyelashes winter white. Luxuriate in the feeling of hot, bubbling water as it envelops your whole body and gently revitalises tired muscles. Watch your nearest and dearest through the glittering haze as they relish every moment. Feel how the stresses and strains of everyday life melt away in the soothing bubbles, how your breathing slows and your whole being is filled with calm and harmony. Nowhere else but here.

All of our high-quality hot tubs are specially designed to suit Swedish conditions, so you can relax no matter what the weather.

Our build-your-own Pro series takes HOT TUBS TO A NEW LEVEL.

A level full of possibilities that allows you to design your own personal hot tub and create your own unique spa environment. Begin by selecting the shell colour. Perhaps you'd like the water to be reflected on a sparkling, winter-white surface. Or assume the warm golden copper hue reminiscent of a late evening dip in a Swedish lake. The inspiration for this shimmering, elegant hot tub comes from the glint of mica in salty coastal cliffs. Combine your choice to match the outer panel colour or maybe create a striking contrast with it.

You could then choose one of our clever purification methods to complement the digital water analyser already built in. And finally, you could add a few extras like mood-enhancing sound and light packages.

Time for an inaugural soak in your own personal hot tub!

PRO

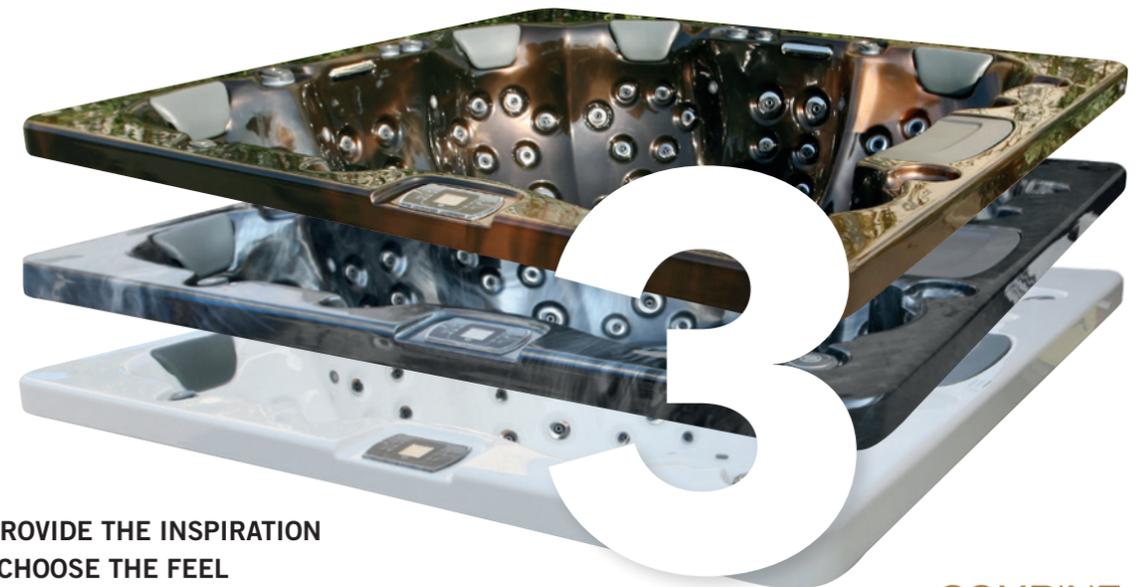

YOUR

FEELING

BUILD YOUR OWN HOT TUB.

WE PROVIDE THE INSPIRATION
YOU CHOOSE THE FEEL

Imagine a winter dip in a freshly cut hole in the ice, with hoar frost on your eyelashes and butterflies in your stomach. A late evening dip in a warm summer lake with nymphs dancing jigs across the surface. Or a salty morning dip in the sea as the perfect start to the day. Capture the feeling, build your own hot tub and relive that feeling time and time again. At home!

The idea behind the Pro series is to let you make the choices. All of the parts are in shades borrowed from our beguiling Swedish landscapes and their unique seasons. Regardless of the ambience and feel you want to create for your hot tub, the number of places you will need and the price point that is right for you, Svenska Pro lets you do it your way.

BUILD YOUR OWN HOT TUB - CHOOSE THE PURIFICATION METHOD

Step 2 in the creation of your hot tub is to choose the water purification method. We offer flexible solutions such as a saltwater package or the SpaFrog system. If you do not want to choose a purification option, you can use standard solutions such as the manual addition of chlorine or Active Oxygen.

BETTER SOAKING WITH A PINCH OF SALT

A saltwater hot tub has a special feel, a bit like a dip in the sea. The water feels smooth and soothing, yet also crisp and invigorating. With a hint of salt on your lips, you can feel the saltwater's healing effects.

What's more, saltwater hot tubs need fewer chemicals to keep the water clear and pure.

All of the models in the Pro series are saltwater friendly.

SPA FROG THE ENCHANTED FROG

SpaFrog is a new, efficient water purification and treatment system. It won't turn into a prince if you kiss it, but it will keep your hot tub clean as if by magic. And really easily too – a soak in the tub should be a picnic.

SpaFrog is a simple-to-use water treatment system specially designed to work efficiently in hot water. When used together with the smart Blue Connect digital pool water analyser (see pages 10-11) built into all of our hot tubs, your system will be virtually maintenance-free.

HOW IT WORKS

The SpaFrog system requires significantly less maintenance than conventional water purification. SpaFrog works using a combination of bromine and minerals and is specially designed to work efficiently in hot water. As water flows through the system, it's purified and disinfected to keep it fresh, clean and healthy.

EASY TO USE

Select the dosage for the bromine and mineral cartridges and insert them in the hot tub's built-in SpaFrog holder. You change one of them monthly, and the other one every three months. The dosage is adjusted simply by turning a knob depending on how often you use your hot tub and the number of people who use it at the same time.

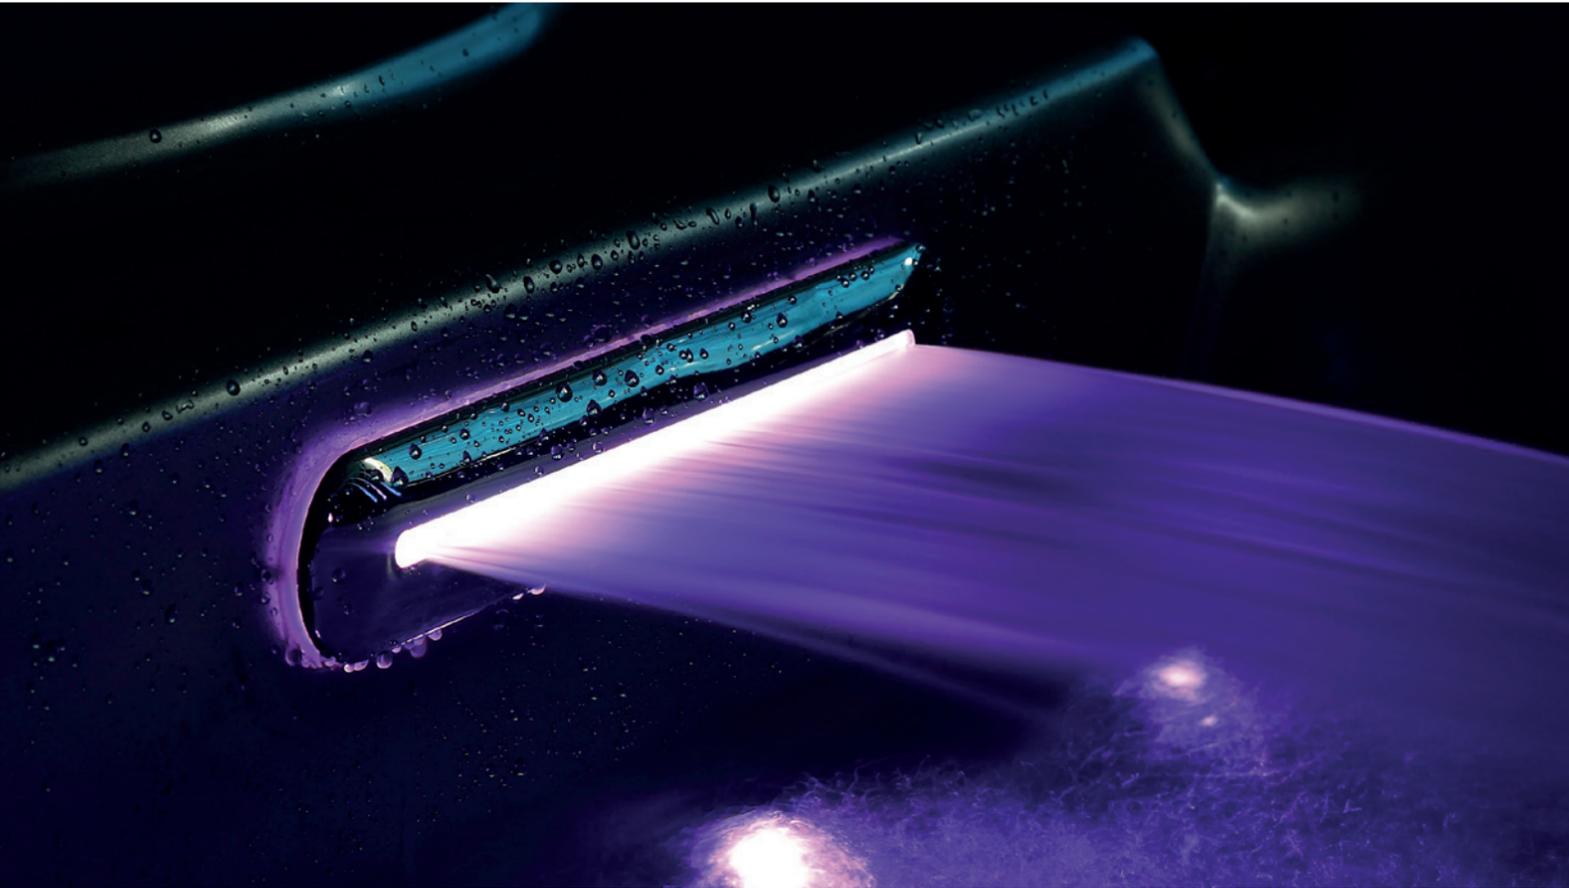

KIND TO THE SKIN

Water purification using the SpaFrog system reduces the need to add chlorine. This makes the water gentler and minimises the risk of chapped skin and watery eyes, and you also avoid that strong chlorine odour.

BUILD YOUR OWN HOT TUB – MAKE SOUND AND LIGHTING THE FINAL TOUCH

To make sure all your senses get their fair share, we've made it possible to add high quality sound and light packages. Select your options when you order your hot tub, and we'll make sure everything is fully installed on shipment.

BATHING IN LIGHT

Enhance your hot tub experience with our elegant lighting package to create an enchanting atmosphere as twilight falls. All Pro series models can be upgraded.

The lighting package includes fibre-optic adjustable lighting at the waterline and illuminated controls.

ON ANY WAVELENGTH

Why should Näcken the Water Sprite be the only one to play music in the bath? Now you can invite Lady Gaga, Beethoven or Elvis to take a dip. Our sound system allows you to set the right atmosphere for the tub from the very start. A total experience.

Our Premium Sound system includes a powerful subwoofer, and two transducers that turn the entire bathtub into a soundbox. Technology that lets you both hear and feel the sound.

BLUE CONNECT GOLD YOUR DIGITAL HOT TUB MONITOR

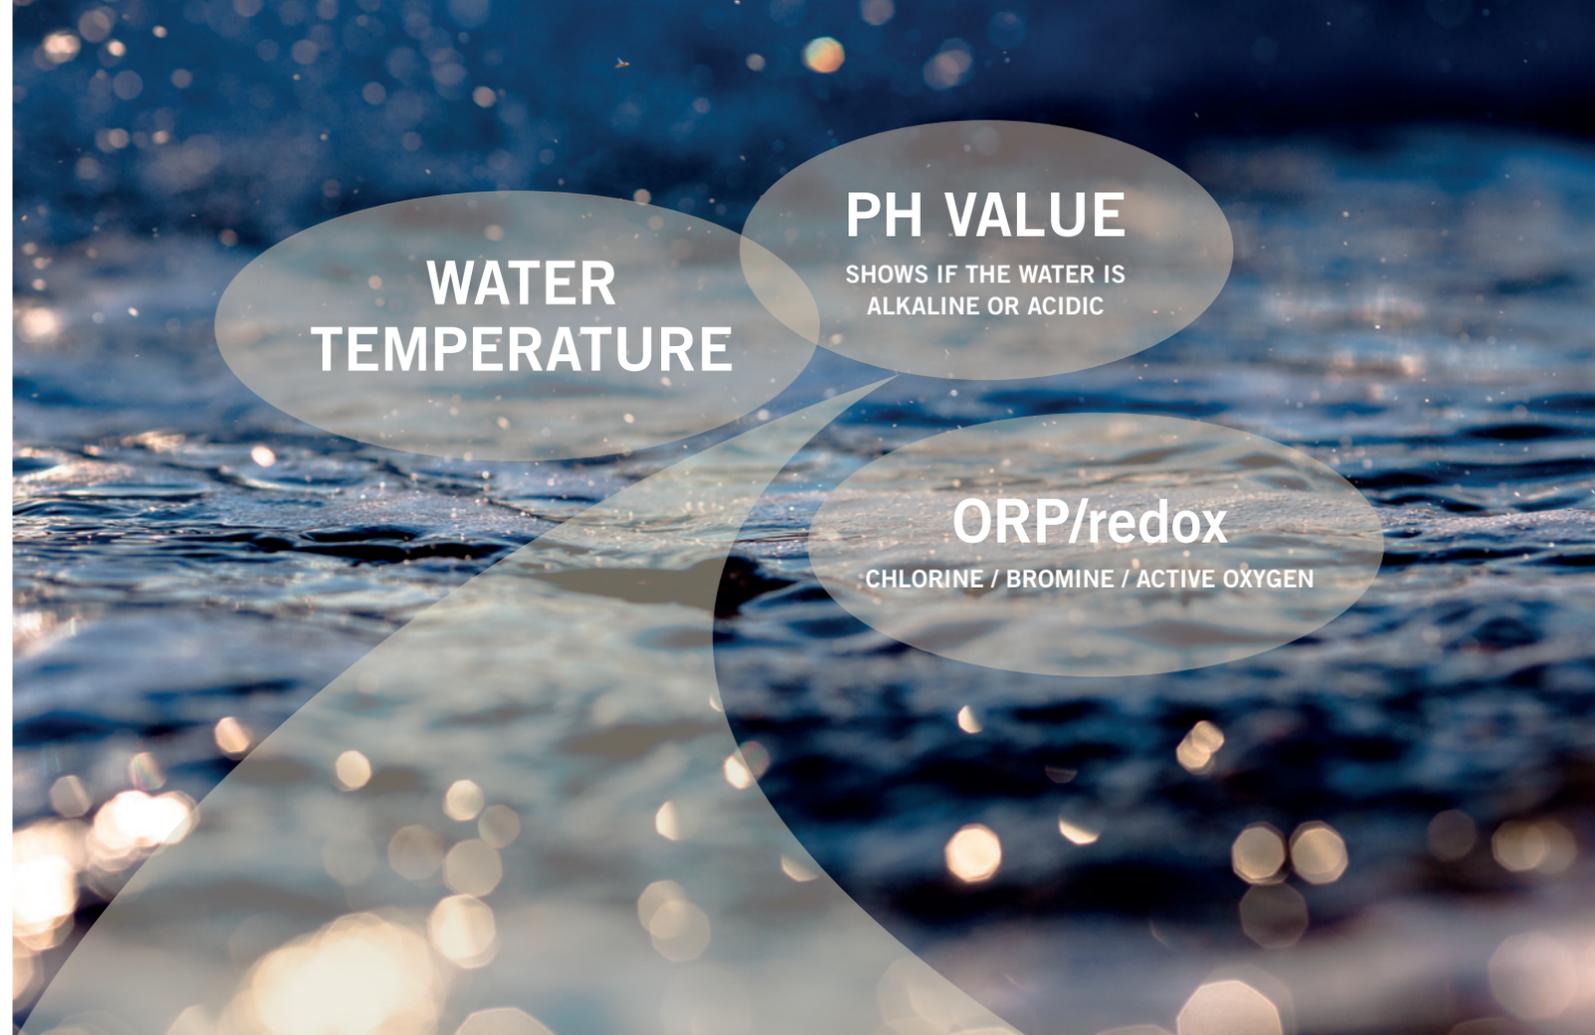

Blue Connect Gold is a smart, digital water analyser that measures water quality. It provides information on what maintenance the tub needs to keep the water clean and crystal clear. Also compatible with saltwater.

You can access your water quality report via the Blue Connect app, available for download to your smartphone or tablet.

WHEN YOU'D RATHER THINK ABOUT
ANYTHING BUT TECHNOLOGY...

... ITS GOOD TO KNOW
THAT IT'S ALREADY THERE

You won't want to ponder technical issues while you're enjoying a soak. That's why we take care of all the technical details when we build our hot tubs. We're perfectly aware of the demands our Nordic climate and the environment make in terms of materials, technology and design. So just close your eyes, lean back and enjoy.

- All seating and loungers are ergonomically designed to give your body maximum relief.
- Our hot tubs are extra deep – perhaps the deepest on the market.
- A hot tub should be easy to maintain and worry-free. That's why we use a fully automatic cleaning system plus a Smart Clean function to loosen up coarse dirt from the bottom. The combination minimises the need for care.
- All of our hot tubs are built on sturdy aluminium frames. A stable structure that keeps the shape and extends the lifetime of your product.
- Svenska Pro is carefully insulated to suit our Nordic climate, save energy and protect our environment.
- All of our hot tubs are fully foamed as our tests show that the more advanced full-foam technology is the most energy efficient compared to the more common 3-layer air-gap insulation.
- Full foam insulation involves:
 - Filling 3 sides with foam insulation.
 - Insulating the tub from the shell to the cabinet.
 - 3-layer insulation on the service hatch to the machinery compartment.
- Our base plates are reinforced and double insulated. Which naturally means you also keep your operating costs down.
- Our unique SilentStream pump lets you enjoy a light yet invigorating flow that is virtually silent. Nothing should disturb your soak.
- All baths have a separate circulation pump, which makes for even better reliability.
- If you choose a hot tub with a sound system, you get four great sounding speakers and a powerful subwoofer in the tub to provide the best possible sound experience.

VIKEN

Viken is our smallest hot tub in terms of size and price, but a clear candidate for the biggest in terms of popularity. There is enough room for the whole family to enjoy a soak together. The first one in gets to stretch out in the lounger while the other four each enjoy a glorious massage in the seats.

SOAKING IN THE TUB HAS TO BE SAFE

Soaking in the tub should be unadulterated pleasure. And utterly worry free. With more than 20 years' experience, we know what it takes to deliver a great hot tub experience.

DESIGN & QUALITY

Our know-how stretches all the way from the drawing board where we design our hot tubs, to the choice of materials and the technical solutions behind the cabinet. We work constantly on design and quality to provide you with a worry-free hot tub experience. Our goal is to deliver high quality at low prices.

THREE-YEAR WARRANTY

Because we want you to have complete confidence in our hot tubs, we always provide a 3-year warranty.

DELIVERIES

Because the Pro series shell is created according to your own specific requirements, it is an order item for delivery as confirmed when placing the order.

LOCAL SERVICE & SUPPORT

You can always reach our specialist service department for rapid service and assistance should anything occur. All of our service staff are trained hot tub specialists and they undergo regular refresher training to keep abreast of new knowledge and stay ahead of the game.

JUST GO WITH THE FLOW
WHEN YOU WANT A SOAK

INSTALLATION AND PREPARATION

Installing a hot tub from Svenska Bad is easy.

Our hot tubs are delivered assembled and ready for installation.

LOCATION Install the hot tub on a flat, compacted surface such as a wooden deck or stone patio (not directly on a lawn).

ELECTRICAL CONNECTION All electrical connections must be made by a **qualified electrician**.

FILLING Use a garden hose to fill the tub with water.

HIGHEST CREDIT RATING.
PURCHASE WITH CONFIDENCE.

Svenska Bad AB is a company with the highest creditworthiness rating from Soliditet.
